

Welcome to our summer ezine!

Eat, socialise and smile with confidence!

If missing teeth are causing you pain, discomfort and embarrassment, then dental implants could be for you!

They can replace any number of teeth, from a single tooth to a complete set. People often tend to lose teeth through old age, gum disease, dental trauma or tooth decay. Whatever the reason they need to be replaced for both cosmetic and functional reasons.

At Coach House, we have state-of-the-art technologies to help us improve all aspects of dental implant treatment. Read about NobelClinician below.

INTRODUCING...

The key to successful treatments

In our last ezine, we described the benefits of our new 3D Cone Beam X-Ray Machine. In this issue, we are excited to introduce our latest investment - NobelClinician, a planning software, that combined with our 3D x-ray machine, allows us to plan for and place your implants more accurately.

With NobelClinician, special tools are provided to mark and visualise the nerves and dental roots as well as other relevant anatomical structures within the 3D scan, so implant planning becomes easier and safer. Also with NobelClinician, we can examine surrounding bone quantity and quality, allowing us to determine the optimal location for implants.

Based on this digital planning we can order a customised surgical template, which includes all the planning information. This template, designed for you and you alone, is then used throughout your surgery to ensure we both prepare the implant site(s) and place the implant(s) in a predictable and minimally invasive way.

The main advantages to you are:

- Fewer visits to the practice
- Minimal or no discomfort
- Quicker healing and recovery time

NobelClinician marks another advance in Coach House's commitment to providing our patients with all the benefits that modern technology brings to dentistry.

Some things are just worth saying again...

More time with you

The practice is fortunate enough to have a highly qualified team of Patient Care Coordinators whose role is to ensure all our patients are happy and fully informed. They can take the time to discuss any aspects of your treatments. If you have any queries at all about your care and/or your treatment, please do not hesitate to contact Lucy, Sarah or Michelle either by phone on 01276 24425 or by email on reception@coachhousedental.co.uk.

Receive £20.00 on us, it's easy!

We reward our existing patients who recommend us to others with a £20.00 John Lewis voucher when their friend or family member attends for their first dental health check.

Ask at reception for full details.

Team of onsite dental experts

At our sister practice, Cedar Clinic, you are assured of top quality advice and/or treatment, with minimum waiting time, should the need arise for more advanced dental treatment options.

Moving forward

After 15 years of working with us as a dental associate, we are pleased to announce that Nicholas Millhouse has joined Stephen Nicoll and Tony Davidson as a co-director of the practice. This significant step sees the practice enter a new level of growth and development, ensuring we remain at the forefront in the provision of private dental care.

We are committed, at Coach House, to providing the highest possible level of patient care and treatment and consider this our priority when seeking a new dentist. We are, therefore, delighted to welcome Nicholas Baker as the most recent addition to the Coach House team. Nick may only have been with us a short time but he has already established himself as a kind, capable and popular Coach House clinician.

Did you know?

Our dental health checks include 16 separate checks of your teeth and supporting tissues to ensure we can help you attain and keep optimum oral health.

Funny Fact number 1

No two sets of teeth are the same – your teeth are as unique as your fingerprints!

Funny Fact number 2

On average, a healthy person produces about 96 gallons of saliva per year!

We do hope you have found the contents of this and our previous ezines interesting and informative. However, should you wish to unsubscribe from this service, please let us know by emailing debbie.fielder@coachhousedental.co.uk
